No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       g
                                                                                the
C;Function:
A;Description: negatively regulates sulfur structural gene expression
A;Note: scon-2+ expression is dependent on CYS3 function and the binding of CYS3 to
C;Superfamily: unassigned WD repeat proteins; WD repeat homology
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  17;

box protein) ubiquitin ligase complex, which mediates the ubiquitination of proteins involved in cell cycle progression, signal transduction and transcription. Regulates the stability CTNNB1 and participates in Wnt signaling.
                                                                  PATHWAY: Ubiquitin conjugation, third step.
SUBMUT: Interacts directly with SKP1 in the SCF complex.
Interacts specifically with phosphorylated CINNB1 and NFKBIA, ubiquitination substrates.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           36;

"Prediction of the coding sequences of unidentified human genes. X.
The complete sequences of 100 new cDNA clones from brain which can
code for large proteins in vitro.";
DNA Res. 5:169-176[1998].
-- FUNCTION: Probably recognizes and binds to some phosphorylated
proteins and promotes their ubiquitination and degradation. May
participate in Wnt signaling.
-- SUBUNIT: PART OF A SCF (SKPI-CULLIN-F-BOX) PROTEIN LIGASE COMPLEX.
-- SUBURIT: PART OF A SCF (SKPI-CULLIN-F-BOX) PROTEIN LIGASE COMPLEX.
-- SUBCRELIVIAR LOCATION: Cytoplasmic (Potential).

Submitted (AUG-2001) to the EMBL/GenBank/DDBU databases.

-!- FUNCTION: Functions cell autonomously to negatively regulate cell cycle progression. Required to restrain cell proliferation in response to developmental cues. Probably recognizes and binds to some proteins and promotes their ubiquitination and degradation (By similarity).

-!- GUBUNIT: Part of a SCF (SKP1-cullin-F-box) protein ligase complex
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     (By similarity).
SOBCELLURAR LOCATION: Cytoplasmic (Potential).
DEVELOPMENTAR STAGE: Highest levels in embryos and adults, lowest levels in larvae. Maternal expression results in high zygotic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SEQUENCE FROM N.A., FUNCTION, DEVELOPMENTAL STACE, AND MUTAGENESIS. Kumar A., Paietta J.V.;
The sulfur controller-2 negative regulatory gene of Neurospora crassa encodes a protein with beta-transducin repeats.";
Proc. Natl. Acad. Sci. U.S.A. 92:3343-3347(1995).
-!-FUNCTION: NEGATIVELY REGULATES SULFUR STRUCTIVALA GENE EXPRESSION.
-!- INDUCTION: EXPRESSED CNLY UNDER LOW-SULFUR CONDITIONS.
-!- SIMILARITY: Contains 1 F-box domain.
-!- SIMILARITY: BELONGS TO THE MET30/SCONB/SCON-2 FAMILY OF WD-REPEAT PROTEINS.
                                                                                                                                                                                        LPEYNFIKFCYRHNPDIQFSPTHTACYKQDLKRTQEINANIAKLPLQEQSDIHHIISKYS
